

EXECUTIVE SUMMARY

Software Developer with 1+ years of experience building enterprise web applications and SaaS platforms using React, Next.js, TypeScript, NestJS, PostgreSQL, and Prisma. Skilled in role-based applications, authentication, REST APIs, business workflows, reusable frontend architecture, and building scalable, maintainable systems.

PROFESSIONAL EXPERIENCE

Monitpro Solutions Pvt. Ltd. — Software Developer

Oct 2024 – Present

TypeScript | React | Next.js

- Engineered and maintained 3+ enterprise web applications using React.js, Next.js, TypeScript, and Tailwind CSS, supporting and streamlining core business workflows.
- Designed modular and reusable frontend architecture using TanStack Query, Zustand, shadcn/ui, and custom hooks, improving component reusability and application state management.
- Implemented role-based access control (RBAC), dashboards, and secure REST API integrations, optimizing data-fetching strategies and server-state management for improved application performance.

TECHNICAL SKILLS

Front-End: React.js, Next.js, TypeScript, JavaScript, Tailwind CSS, Zustand, TanStack Query, shadcn/ui
Back-End: Node.js, Express.js, NestJS, RESTful APIs, JWT, RBAC
Database & ORM: PostgreSQL, MongoDB, Prisma ORM, Mongoose
DevOps & Version Control: Docker, CI/CD, Git, GitHub

PROJECTS

EJR (Engineering Job Request System)

Company Project | React.js | TypeScript | Tailwind CSS | React Context API

- Engineered a role-based job request workflow using React.js, TypeScript, Tailwind CSS, and React Context API, enabling users to create, assign, approve, and track engineering job requests through their respective workflows.
- Integrated and orchestrated RESTful API interactions to manage request data and maintain consistent workflow states across different user roles.

MAURIS (Equipment Maintenance Management System)

Company Project | React.js | Next.js | TypeScript | Tailwind CSS | TanStack Query | Zustand

- Built an equipment maintenance platform in Next.js, TypeScript, and Zustand to automate preventive maintenance and breakdown workflows for 1,000+ industrial assets.
- Optimized API performance via TanStack Query, caching RESTful requests to cut redundant network traffic by 40% and improve dashboard response times.
- Streamlined technician assignment modules, reducing equipment downtime and accelerating maintenance task completion across manufacturing operations.

CRMS (Contractor Resource Management System)

Company Project | React.js | TypeScript | Tailwind CSS

- Collaborated with the development team to enhance the CRMS platform, delivering responsive frontend pages and UI components using React.js and Tailwind CSS across multiple business workflows.
- Designed and delivered the E-Care module for managing facility assets such as air conditioners, fans, and switches, introducing dedicated workflows for maintenance request tracking and scheduling.

Maintix (Multi-Tenant Equipment Maintenance Management System)

Personal Project | React.js | Next.js | TypeScript | NestJS | PostgreSQL | Prisma ORM | Tailwind CSS

- Built a full-stack multi-tenant SaaS platform using React.js, Next.js, TypeScript, NestJS, PostgreSQL, Prisma ORM, and Tailwind CSS, supporting isolated workspaces for 10+ organizations.
- Architected secure authentication, tenant isolation, and role-based access control (RBAC), enabling granular permissions across users and assigned factory access.
- Unified preventive maintenance, equipment tracking, breakdown management, checklists, scheduling, notifications, and organization workflows into a single maintenance platform.

EDUCATION

Master of Computer Applications (MCA) — Pursuing

Bharathidasan University | 2025 – Present (Distance Education)

Bachelor of Science (B.Sc.) – Physics

Bishop Heber College | 2021 – 2024
